DETAILED ACTION

Allowable Subject Matter

Claims 1, 7, 9-17 and 28-29 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 recites an inventory control system that has a hand-held bar code scanner that can also print UPC bar code shelf labels in combination with a very specific database. Special note should be taken to applicant's claim language, "said database consisting of: ...". Per MPEP 2111.03, the transitional phrase "consisting of" excludes any element, step, or ingredient not specified in the claim. Given this interpretation, none of the prior art discloses the specific claimed invention.

Kayser et al. shows a system of interest with a portable scanner/printer. Rauber et al. show a system of interest. Previously cited Perkowski taught a good-sized database, but not the exact particulars of the claimed invention. Any modification to Perkowski to meet the specifics of the claimed invention would be hindsight. Barbati is a NPL reference of interest. Adelman is a foreign reference of interest.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
